

Saving a given coordinate as a waypoint GPSMAP® 64/64s

Press in and hold **MARK**. The waypoint screen is shown.

Highlight the coordinate field with the arrow buttons and press **ENTER**.

Using the arrow key scroll down and change the given coordinate using the arrow and **ENTER** keys. When finished scroll to **DONE** and press **ENTER** for main waypoint page.

Change the name of the waypoint, highlight the name of the field with the arrow buttons and press **ENTER**.

Select letters with the arrow keys and **ENTER** key. Scroll to **DONE** when finished. The keypad will vanish leaving the main waypoint page.

Save the waypoint by scrolling to **DONE** and pressing **ENTER**.
